Valerie Maxville

Associate Professor at Curtin University
St James, Western Australia, Australia

Summary

Valerie Maxville is an experienced educator who is passionate about technology and it's potential. She enjoys making technology accessible - taking on the challenge of communicating complex concepts to diverse audiences.

Valerie currently lectures in Computer Science at Curtin University and was previously the Course Coordinator for the Master of Predictive Analytics (2018-2025). From 2007 to 2016 Valerie coordinated and delivered training, internships, outreach and user engagement at the Pawsey Supercomputing Centre (iVEC) to increase awareness and uptake of computational science. Valerie holds a PhD in Computer Science (Software Engineering) and an Honours degree in Computer Science. As an industry volunteer, Valerie actively promotes careers in computing and local industry development. She is a Fellow of the Australian Computer Society (ACS) and a Senior Member of the Institute for Electrical and Electronic Engineers (IEEE).

Her passions are software engineering, computational science, industry development and encouraging more people into this exciting and creative industry. Highlights of her voluntary work have been ACS WA Conferences, ICTWA Conferences, the ICT Skills Leadership Group and ICT careers promotion at local Expos.

Specialties: Software Engineering, eResearch, Computational Science, Industry Development, Education and Training

Experience

Curtin University

7 years 6 months

Associate Professor
January 2025 - Present (1 year 5 months)
Perth, Western Australia, Australia

Senior Lecturer (Computing) and Course Controller (Predictive Analytics)
December 2018 - January 2025 (6 years 2 months)
Bentley

Curtin University
Sessional Academic
2016 - 2018 (2 years)

Pawsey Supercomputing Centre
User Support Manager
2014 - 2016 (2 years)

The Pawsey Supercomputing Centre (previously iVEC) is encouraging and energising research using supercomputing, large scale data storage and visualisation in Australia. We provide facilities and expertise to the research, education and industrial communities. Application areas include nanotechnology, radio astronomy, high energy physics, medical research, mining and petroleum, architecture and construction, multimedia, and urban planning, amongst others.

As well as providing access to supercomputing facilities, the Pawsey Supercomputing Centre holds seminars and symposia on data, visualisation and supercomputing, and provides support to students and industry personnel, researchers, academics and scientists through training, internships and workshops on advanced computing and research and development opportunities.

The User Support Manager coordinates user engagement, community development, training, internships, helpdesk and merit allocation of resources.

iVEC (became the Pawsey Supercomputer Centre)
Education Program Leader
2007 - 2013 (6 years)

The iVEC Education Program aims to promote the use of advanced computing through the education sector in WA, and to provide relevant training.

The program has four main goals:

* Identify needs and develop education programs
* Encourage the use of advanced computing and eResearch
* Run the iVEC internship program
* Raise awareness of advanced computing

iVEC offers online courses, short courses and workshops in a variety of areas, we also provide tours of our facilities.

Curtin University of Technology
Research Associate
July 2005 - June 2007 (2 years)

Murdoch University
Lecturer
2001 - 2004 (3 years)

Curtin University
HR Systems Administrator
1998 - 2000 (2 years)

Education

Curtin University of Technology
BSc, Computer Science

Edith Cowan University
PhD, Software Engineering
